- Mains or battery operated

Everything you need

- Repeat alarm with adjustable snooze time
- Dual alarm with weekday and weekend settings
- Gentle wake with increasing alarm volume
- Sleep timer for easy fall asleep to your favorite music

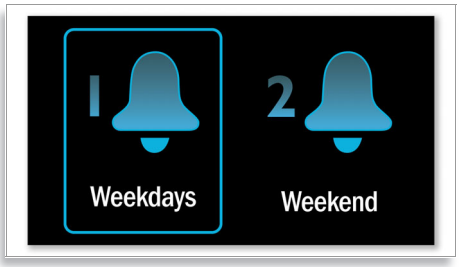
PHILIPS

sense and simplicity

Highlights

Backlight effect
When the alarm sounds, the backlight will blink at the same time. For young children, it is an easy way to indicate when they should get up even if they do not yet have any concept of time. The light will blink for one minute and then turn off until the alarm sounds again.

Dual alarm

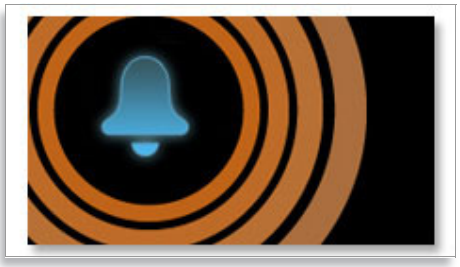


Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient features saves you from the hassle of fiddling with different alarm times every single night.

Exchangeable color rings
Exchangeable blue and pink color rings and button add fun and personality to the clock radio. Create your own identity or match it to your room's style. Options include the two ear knobs on top and the ring in front.

FM digital tuning
FM digital tuning with auto scan and presets

Gentle Wake



Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

Mains or battery operated
Mains or battery operated

Nap timer
Numerous studies have shown that taking a nap during the day is good for your health. The nap timer helps you get into this healthy habit by letting you take a brief nap without worrying about oversleeping or having to reset your alarm each time. Simply press one button to enjoy a healthy nap from 15 minutes to two hours before you head back to your busy day. The nap timer will automatically count down to zero and a buzzer will sound at the pre-set time to wake you up.

Adjustable snooze time
To counter oversleeping, the Philips Clock radio has an adjustable snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat alarm button once and go back to sleep. Five minutes later the alarm will ring again. If you want to get more sleep than that, press the Snooze button twice for 10 minutes or three times for 15 minutes.

Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 1 hour) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

Wake up to your recorded voice
Wake up to your recorded voice or that of your loved one. Simply press the Record button to create a 10-second message and press the Play button to hear it back. Use it as reminder for yourself or for your children when you are not around.
